New Printer Driver 13.53 New Document Imaging SDK 12.05

Black Ice Software has released the ColorPlus, PDF, Tiff/Monochrome and Color OEM document convert printer drivers version 13.53 with more enhancements for PDF and PDF/A file formats. This release focuses on Merging TIFF pages into a single TIFF page and improving the PDF output quality.

PDF enhancement;

- Fix printing problem in Crystal Report
- Stability improvement for drawing objects

Merge TIFF pages into a single TIFF page

Using the Black Ice Printer Driver

The Oil Industry Drilling Measurement Logs, stored in multipage TIFF or PDF files, need to be combined into a continuous single page TIFF file to be viewed as one continuous page. The Black Ice Printer Driver can be configured to automatically append the printed TIFF file(s) to a single page TIFF file, by using the AppendTiffCmdLine.exe utility with the printer driver.

The AppendTiffCmdLine.exe utility is available only for customers and is not available in the demonstration version of the printer drivers. The Append Tiff Pages into a Single Tiff Page utility is available for both Licensed "End User" and OEM versions of the Tiff/Monochrome, Color, and ColorPlus printer drivers and it is compatible with older versions of the printer driver. For more information please contact sales at sales@blackice.com. For technical details please visit [the following link](#).

Black Ice Software has released Document Imaging 12.05 with several fixes

- TWAIN used in CAB files.
- TIFF Reading.
- TIFF Append (Merge).
- Some internal file handling.
