The ability to **print from any windows application, convert the document to PDF, TIFF, etc..., and store the document directly in an SQL database with a single click** is now available in version 15.95 of the Black Ice Printer Drivers!

Another new feature available in version 15.95 is the ability to store the directory path of the document in the SQL database while the document is stored on a network or local drive.

The **Upload to database** feature uses ODBC interface and provides great flexibility to select **any SQL database** which is ODBC compatible.

The **document** can be **printed** and uploaded to the database **through memory** without having any

footprint on the local System/PC **remaining fully HIPAA compliant.**

The Upload or save to database main parameters, such as Index field value and the Table name can be passed to the “Start Application” for each printed document for further post printing processing.

The new feature of print and Save to a database is an optional feature and can be disabled during the installation process.

The **print** and **Save to database** is available for the **ColorPlus X1, PDF X1, and Tiff/Monochrome X1** printer drivers.

The complete list of improvements in the latest Printer Driver includes the following:

- Added feature to Upload documents to database (#11838)
