Activate Parallel Printers or Ports automatically with registration!

10% discount for Print2Email*

Coupon code: **gEMArt6**

Valid through July 31th 2020

Download the Printer Driver Now!

Black Ice Software has released all new **printer driver** features in version **16.17.2494**. These new features include adding multiple ports for parallel printing or adding multiple parallel printers automatically by simply activating the printer driver with a serial key! The **registration/activation** process now **automatically creates** the **parallel printers** or creates the **parallel ports** for printing. The great advantage of this unique technology, is it greatly simplifies **installation and deployment** of parallel printers, which is a feature **initially introduced in 2015 by Black Ice Software**. Simply registering/activating the printer driver with a serial key allows the activation process to create the printers or adds the ports in the background.

The advantage of **printer** with **parallel ports** is that every user on the system **only sees one printer** for document conversion, Emailing, Uploading files to the Web Server, FTP server, or

Database but **in the background there could be 10-50 parallel conversions going on.**

For example; on a server where there are 25-50 users working from home and in the morning all of the users need to print or convert documents at the same time, some user have only a few page documents but other users may have 20-50 pages document, the users have to wait until each print job in the queue goes through one printer driver one job at the time. But with parallel printing each print job converted simultaneously in parallel, a significant time saver and frustration saver.

Do not confuse Agent (task) printers with parallel printers. **Agent printers are not parallel printers**, each agent printer can have his own configuration for a specific task but there is only one driver and one port for all the agent printer. Every print job sent to Agent printers are going through one driver sequentially one at a time.

Read more about parallel printing by clicking [here](#).

The complete list of improvements in the latest Printer Driver includes the following:

- Adding Printers or Ports automatically when the driver is registered (#12795)
- Added the TLS 1.2 support to the Upload to FTP feature (#12761)
- The "Upload document to Web" feature only available in the X1 Printer Drivers (#12717)
- Stability improvement for selecting the conversion profile in Printer Manager, when installing the Printer Driver with the MSI installer for Agent printers using APLIST parameter (#12006)
- Renamed the "Document Converter Configuration Manager" to DCCM in the Printer Driver Server installers (#12739, #12740)
- Added the DCCM to the InstallShield MSI installer for the Printer Driver Server (#11559)
- Minor user interface improvements for the DCCM (#12710, #12714)
- Minor user interface improvements for the Printer Manager Agent Printer tab (#12724)
- Minor user interface improvements for the Printer Driver installers (#12672, #12673, #12627)
- Updated Manuals

Free Upgrades and Priority Support

Do not forget to subscribe to future releases by purchasing maintenance. With an active maintenance subscription, you will receive all new releases for free! Priority email technical support is also included in your subscription. For more information, call us at **+1 (561)-757-4107 Extension 3**, or sales@blackice.com.

As a special offer, if your maintenance subscription has expired or you did not include the maintenance subscription in your original purchase, simply refer to this newsletter to renew or add maintenance retroactively!

For license information, please visit our [Customer License Management Portal](#).

*Only valid for new purchases, no upgrades or add-ons. This offer cannot be combined with any other discounts.
