10% discount for Printer Driver\*

Coupon code: **gEMArt6**

Valid through July 31st 2021

Download the Printer Driver Now!

The latest release of the Black Ice Printer Driver now includes a **much faster text extraction** feature!

The new Printer Driver can extract the text from the printed documents up-to **10 times faster** than previous versions, helping customers to convert documents to text **more efficiently**. This is a **critical update** for **customers** who are using text extraction.

The highly improved Text Extraction performance affects **all three types of text output**:

- Plain text

- Text with layout
- Text with font information, position, and style

The Text Extraction feature is an **efficient way** to extract the text information from documents, then save it as a **standard text file** next to the printed document. Customers can **take advantage** of the text extraction feature in several ways depending on their business needs, such as **archiving the text information** from documents or building a **searchable database** with all their documents.

The new version of the Printer Driver also comes with **major quality improvements** for printing documents to **PDF**. Additionally, the latest Printer Driver comes with further stability improvements for printing vector arc objects.

Last but not least, the new improved PDF printing now includes a feature to print documents to PDF with or without a white page background, providing more control over how the PDF is generated.

The complete list of improvements in the latest Printer Driver includes the following:

DATE: 07-13-2021
