

## Auto-Print 16.75 is released!

Automatic page properties detection is now available  
in the latest Auto-Print SDK!

Page size

Page orientation

Color depth

**10% discount for Auto-Print SDK\***

Coupon code: **gEMArt6**

*Valid through January 31st 2022*

**Download Printer Driver Now!**

Black Ice Software is proud to announce the newest release of the Auto-Print SDK with significant new features and many enhancements for developers!

Some of the recent features additions are:

- **Keeping the page orientation.** Multi-page documents contain mixed portrait and landscaped oriented pages. In the conversion process this pages mostly get converted portrait or landscaped mode and orientation was lost.
- **Maintaining the page size.** Many multi-page documents can contain different pages sizes like Letter, A4, and Legal page sizes.
- **Preserving Image resolution.** Preserving image resolution of the original document can be an important factor when converting documents. If the original document had a high resolution of 1200 DPI image; the new format will preserve the 1200 DPI resolution.
- **Maintaining the color depth of the original document.** When documents are converted many cases the color depth 1-bit, 8-bit, 24-bit is uniformly converted to 1-bit or 24-bit and critical document quality information is lost.

Each of these new features listed above can be **enabled/disabled through** the API function call **BIAPSetIntProperty()** to configure conversion properties or permanently pre-set these features through the **BiAutoPrint.ini** file.

**Other notable additional Improvements are:**

- Added auto-detection of Adobe Reader 64-bit.
- Added auto-detection of Foxit Reader 64-bit.
- Added better detection of password protection in PDF files, and the ability to remove invisible white backgrounds from some PDF documents.

The complete list of improvements in the latest Auto-print includes the following:

DATE: 01-05-2022

Version: 16.75 (revision: 503)

- Improved licensing related error messages (#14745, #14746)
- Stability improvement for license checking if Auto-print was registered manually (#14743)
- Updated eLicense.dll to version 6.27.294
- Updated BuRegister.dll to version 16.76.2736

DATE: 09-21-2021

Version: 16.65 (revision: 495)

- Added option to keep the page orientation and size when converting images (#14105, #14130)
- Added option to keep the Color Depth when converting images (#14409)
- Stability improvement for detecting password protection in some PDF files (#14265, #14387, #14397)
- Stability improvement for printing PDF files with Foxit PDF Reader version 11 and above. (Foxit Reader was renamed to Foxit PDF Reader, causing Auto-print SDK to not be able to find it.) (#14403)
- Updated Document Imaging DLLs to version 12.84.830

DATE: 08-09-2021

Version: 16.61 (revision: 481)
