Black Ice Software - April 24, 2014

Print From Windows Services!

New Auto-print API, Improved PDF Printing and improved Redirect printing!

Black Ice Software has released the OEM Printer Driver version 13.98 with the API/Resource Toolkit. The **updated Auto-print API** enable developers to print **MS Office Documents from Windows services**. The **Auto-print API** can be executed under Windows **2012/2008 R2/ 2008 services** to convert MS Office documents and Image file format such as TIFF, JPEG, PNG, etc.

The Auto-print service can run under the "Administrator" account instead of under a particular user or System Account. This allows **the Auto-print service to continue the document conversion even after the current user is logs off in unattended mode**. The base requirement is for MS Office 2013, 2010, or 2007 to be installed on the server.

New Auto-print API
Print from Windows Services

- ✓ Continues to print after the current user logs off
- ✓ Start printing before a user logs In

Added updated Auto-print API to be executed under a service

Version 13.98 of the Printer Drivers includes **stability improvements for printing**. Stability improvements for **"Create Faxable Image"** feature, improvements in the installation and uninstallation and **improvements for PDF printing**.

The complete list of improvements in the latest Black Ice Printer Driver includes the following:

- Added updated Auto-print API to be execute under a service
- Added fax format support to the AutoPrint samples
- Improvements for forcing the DPI on printing application
- Improvements in the Installation and Uninstallation
- Stability improvement for printing
- Improvements for PDF printing with rotated objects
- Updated Documentation
- Updated Free TiffViewer

Windows Service Printing Sample is available on request.

Windows service printing compatibility coming soon for IE, XPS, and PDF documents.
