Black Ice Software - December 2, 2014

Printer Driver 14.17 is released!

Improvements to significantly speed up printing time!

Black Ice Software has released the Printer Driver 14.17 including improvements in font handling during printing to **speed up the printing time**. The latest release of Black Ice Printer Driver handles the slowdown in Black Ice Printer Drivers especially when **printing PDF documents to TIFF** file format which was introduced in **Microsoft KB2998812 Windows Update**.

The latest release of Printer Driver version 14.17 drastically reduces the printing time on every operating system when printing **short or extremely large documents**.

Beside the reduced printing time, version 14.17 includes improvements for the Printer Driver **MSI Installers to handle the damaged User profiles** on operating systems, includes **improved error handling** for non-connection errors during registration, and improvements for printing with "Enable advanced printing features" unchecked.

The complete list of improvements in the latest Black Ice Printer Driver include the following:

- Improved temporary font handling
- Stability improvements for MSI Installers when the ntuser.dat file is damaged or renamed on the computer.
- Stability improvement in license registration
- Improved error handling for non-connection errors during registration
- Stability improvement for printing with "Enable advanced printing features" unchecked, output disabled and text output enabled
- Updated manuals

Free Upgrades and Priority Support
