## Printer Driver version 14.49 is released!

**New Redirect Printing capabilities to print multiple copies to physical printers, and to print collated or uncollated pages!**

Black Ice Software has released the Printer Driver version 14.49. This version includes **new Redirect Printing capabilities**. The new Black Ice Printer Driver can print **multiple copies** to physical and virtual printers, allowing users to duplicate documents more **quickly and easily**.

Version 14.49 of the Black Ice Printer Driver includes improvements for the printing redirection. Now you can print the document pages **collated and uncollated**. This new Version also includes stability improvements for **flipping** the redirected pages horizontally and vertically.

The new Black Ice Printer Driver comes with **new "Copy Number" variable** for Annotations, Header and Footer, allowing users to add the number of the current copy to pages. For example, if redirecting two copies to a physical printer, then the first copy will have number 1 on every page and the second copy will have number 2 on every page.

Version 14.49 of the Black Ice Printer Drivers also includes improvements for the Text Extraction feature, to **disable the bates numbering** in the text output, allowing users to create continuous text outputs without page number delimiters.

**The complete list of improvements in the latest Black Ice Printer Driver include the following:**
