*Valid through July 31th 2020*

**Download the Printer Driver Now!**

Upload converted document directly to the Web using HTTP and HTTPS!

Black Ice Software has released version 16.16 of the Printer Driver with additional improvements to uploading HIPAA and other secure documents to web servers using HTTP and HTTPS protocol. The Upload to Web feature can now be configured on the Print Manager User interface simplifying the entire setup process.

By using the new Upload to Web feature, users can send the converted documents to a specified web address with POST requests, which is the most common solution to upload documents to a

website.

The Upload to Web feature comes with an optional silent mode, allowing users to upload the converted documents to the web in the background without any user interaction. Reducing any potential errors users could make and improving efficiency with reduced steps.

Users can now maintain **HIPAA compliance when uploading documents** to a Web Server through HTTPS/HTTP protocol. This is done by **converting the document in “memory”** and uploading the document **directly to the Web Server** without ever writing the document to the local PC disk.

Many EMR (Electronic Medical Record) & EHR (Electronic Health Record) applications use a Web interface for HIPAA compliance so medical records are never stored on the local PC, but users need to exchange, convert and upload documents between their different HIPAA compliant applications. This can now be done with the use of a Black Ice Printer Driver. Accompanied with Agent Printers, IT administrators can configure multiple printers for different tasks and even silent Upload to Web for unique applications.

The complete list of improvements in the latest Printer Driver includes the following:

- Stability improvement for special OEM builds - installing a large amount of drivers on a single system (#12637)
- Stability improvement for content based emails ending (automatically removing line breaks from addresses) (#12655)
- Added command line parameters for setting the proxy server when uninstalling the Printer Driver using the MSI installer (#12529)
- Added HTTP Upload feature to the Printer Manager (#12570)
- Added environment variable support for HTTP Upload feature parameters (#12213)
- Updated Manuals

### Free Upgrades and Priority Support

Do not forget to subscribe to future releases by purchasing maintenance. With an active maintenance subscription, you will receive all new releases for free! Priority email technical support is also included in your subscription. For more information, call us at **+1 (561)-757-4107 Extension 3**, or [sales@blackice.com](mailto:sales@blackice.com).

As a special offer, if your maintenance subscription has expired or you did not include the maintenance subscription in your original purchase, simply refer to this newsletter to renew or add maintenance retroactively!

For license information, please visit our [Customer License Management Portal](#).

\*Only valid for new purchases, no upgrades or add-ons. This offer cannot be combined with any other discounts.
