with a single click with the latest Printer Driver!

10% discount for Printer Driver*

Coupon code: **gEMArt6**

Valid through October 31th 2020

Download the Printer Driver Now!

Black Ice Software has released **Printer Driver version 16.26** including the **Popular M-Files** (intelligent document management system) for saving documents **with Meta-data!**

M-Files allows you to find information based on what it is rather than where it's stored and utilizes artificial intelligence to help you manage documents.

The Black Ice printer driver allows authorized users to **save documents** in the **M-Files Vault** with a **single click** of "print," from any application, using the M-Files **Web Client**. In the printer driver user interface we implemented the M-Files properties and after the User prints one can **manually select properties**. The M-Files client is not required to be installed. The OCR data and plain text data extracted from the document can be uploaded to the Vault in addition to the document

itself.

The M-Files implementation includes over 30 built-in properties and unlimited custom properties. Black Ice Software supports the following M-Files data types; Bool, text, multi-line text, 32 bit integer signed, 64 bit signed integer, floating-point, lookup (select from list), data, time, multi select lookup (multi-line section).

Saving data in a secure and simple way is a critical mission for every business from Contract Management, Document Management (System), Enterprise Content Management, Enterprise Information Management, Human Resources, Project Management, and Quality Management.

Additional critical improvements in the printer driver include **saving the Administrator configuration changes** to the **System account** automatically to simplify shared out printer configuration.

Also included is **PDF improvement** of writing vertical positioning of characters in PDF files for **Arabic (accents), Japanese, Chinese and Hindi languages**.

The complete list of improvements in the latest Printer Driver includes the following:

DATE : 09-29-2020

Version : 16.26 (revision: 2544)

- Added raw text datatype support to handle print jobs from legacy software systems (#12840)

DATE : 09-23-2020

Version : 16.25 (revision: 2533)

- Added new feature to upload documents to M-Files (#13044)
- Improvements for vertical positioning of characters in PDF files for Arabic, Japanese, Chinese and Hindi languages (#13001)
- Added "Print document as bitmap" option to the "Redirect printing" feature (#12950)
- Updated PDF DLLs to version 3.1.3.720

Free Upgrades and Priority Support

Do not forget to subscribe to future releases by purchasing maintenance. With an active maintenance subscription, you will receive all new releases for free! Priority email technical support is also included in your subscription. For more information, call us at **+1 (561)-757-4107 Extension 3**, or sales@blackice.com.

As a special offer, if your maintenance subscription has expired or you did not include the maintenance subscription in your original purchase, simply refer to this newsletter to renew or add maintenance retroactively!

For license information, please visit our [Customer License Management Portal](#).

*Only valid for new purchases, no upgrades or add-ons. This offer cannot be combined with any other discounts.
