Black Ice Software has released **Printer Driver version 16.27** with support for **extra-large paper sizes!**

Windows normally limits the standard paper sizes to no larger than 327 cm, 3276 mm. The largest predefined standard paper size in Windows is **B0** designed for engineering or physical plotter printers. There is, however, a way around Windows legacy **limitation of 327 cm** and one can now add custom paper sizes **up to 3276 cm**, 1290 inches or 99999x99999 pixels!

The addition of extra-large paper sizes is ideal for those involved in Engineering drawing, Graphic design, Graphic modeling, Geology, Mapping, Aero Space, Oil Drilling industries and more. Most windows application, such as Microsoft Office applications, will ignore the extra-large paper

as these applications do not support extra-large paper sizes. There are a few specialized applications such as AutoCAD, Adobe Photoshop, Foxit Reader, Microsoft Edge and Microsoft Notepad that can handle extra-large paper sizes.

Black Ice Software has also included in release **16.27 of the Printer Driver** some small but important improvements to the **new and recently added Upload to M-Files** feature of the printer driver.
