**Uploading** documents to  
SharePoint **through memory**

**10%** discount for Printer Driver\*

Coupon code: **gEMArt6**

Valid through April 30th 2022

**Download the Printer Driver Now!**

Black Ice Software's latest release of the Printer Driver Version 16.90 includes significant new features including an option to upload documents to SharePoint through Memory, **added legacy IBM IOCA and MO:DCA outputs**, and additional improvements for existing features.

- **Uploading documents** to SharePoint **through memory** without the converted document ever being written on the local PC for a fully **HIPAA compliant** document converter. By converting documents in Memory the file will never be written to the user's PC, preventing them from being able to intercept a file during the conversion process and helping to protect PII.
- Added **IBM IOCA** and **MO:DCA** output formats to the Printer Drivers. The IBM IOCA and MO:DCA file formats support 1 bit black and white color depth with IBM MMR compression, 8 bit grayscale with JPEG compression, and 24 bit color with JPEG compression. The MO:DCA file format supports single and multi-page documents.
- Usability improvements include showing the "License Type." For example customers with Subscription-based license or perpetual license will now have this information available in the about tab. The Printer Manager About tab also now shows the actual version number of the Printer Driver installed on the system.

The complete list of improvements in the latest Printer Driver includes the following:

DATE : 04-20-2022

Version : 16.90 (revision: 2814)
